

VISION WORK LAMP

INDEX.18

The Vision Work Lamp is an innovative task lamp, designed to improve the work environment for people who used ultra-bright task lighting.

The Vision Work Lamp has two main functions: Automatic mode, providing the user with optimal levels of illuminance and colour maintaining a healthy light source on the work area, reducing eye fatigue and glare. With optional manual mode for user defined settings, allowing a preferred illuminance and colour to be set. The Vision Work Lamp is designed to improve worker wellbeing increasing workplace satisfaction, additionally increasing worker performance as a result.
